

# SOUMYAJIT DAS

Bangalore, Karnataka • +91 9647395037 • dsoumyajit.co@gmail.com • linkedin.com/in/dsoumyajit/

## Summary

Product Engineer with 3.5+ years of hands-on experience building high-performance web applications and platform solutions using C#, .NET, Vue.js, SQL Server, Redis, and REST APIs. Experienced in AdTech integrations, deployment automation, frontend modernization, and performance optimization across large-scale systems. Currently contributing to DeltaX's in-house AdServer and AI-driven platform initiatives while mentoring junior engineers and owning end-to-end feature delivery. Known for clean, modular code, strong debugging skills, and building reliable, maintainable systems.

## Skills

|                         |                                                                                                             |
|-------------------------|-------------------------------------------------------------------------------------------------------------|
| Languages               | : C#, JavaScript, TypeScript, SQL, HTML, CSS                                                                |
| Frontend                | : Vue.js, Bootstrap, Vuetify, iView                                                                         |
| Backend                 | : .NET Core, .NET Framework, ASP.NET MVC, Node.js, LINQ                                                     |
| Databases & Caching     | : SQL Server, Redis                                                                                         |
| DevOps & Infrastructure | : Jenkins, IIS, Git, Bitbucket, NuGet, CI/CD Pipelines                                                      |
| Testing & Debugging     | : ViTest, SpecFlow, Chrome DevTools, Burp Suite                                                             |
| API & Integrations      | : REST APIs, Dapper, Entity Framework, Service-Repository Pattern, Meta Ads API, Google Ads API, Moloco API |
| Other                   | : Agile, Scrum, Jira, Power BI Integration, AI Integration Concepts, MCP Servers                            |

## Professional Experience

### Product Engineer | DeltaX

Bengaluru, Karnataka | Nov 2025 – Present

- Contribute to the architecture and development of DeltaX's in-house AdServer platform focused on scalable ad delivery and campaign execution.
- Contribute to technical discussions and architectural decisions around core platform capabilities.
- Own end-to-end delivery of features across frontend, backend, APIs, and deployment workflows.
- Mentor freshers and interns through code reviews and implementation guidance.
- Contribute to AI-driven platform initiatives focused on reducing user friction and improving advertiser workflows.
- Contribute to internal infrastructure initiatives including MCP server development and platform scalability improvements.
- Developed and optimized landing pages for MG Select, implementing SEO improvements, dynamic sitemap generation with caching, and domain routing/CDN delivery using Route 53 and CloudFront.
- Collaborate cross-functionally with Product, QA, DevOps, and Customer Success teams in agile sprint cycles.
- Contributed to the foundation and architecture of DeltaX's proprietary AdServer platform.
- Implemented dynamic sitemap generation and CDN optimization strategies to improve SEO indexing and landing page delivery performance.
- Helped drive modernization initiatives focused on automation, infrastructure optimization, and AI-assisted product experiences.

### Associate Product Engineer | DeltaX

Bengaluru, Karnataka | Jul 2023 – Oct 2025

- Revamped legacy frontend modules built using .NET MVC and Knockout.js into modern Vue.js SPAs, improving UX and maintainability.
- Developed and maintained API integrations for advertising platforms including Meta, Google, and Moloco to support seamless campaign and ad exports.
- Built reusable Vue.js components using ViTest-driven development to improve maintainability and code quality.
- Contributed as part of the technology partner team for JioCinema, including development and optimization of the ads.jiocinema.com landing platform.
- Developed and maintained scalable .NET services deployed via IIS on private infrastructure.

- Created and maintained NuGet packages to improve code reusability and internal development workflows.
- Automated deployment workflows using Bitbucket and Jenkins webhooks, improving deployment efficiency and reducing manual effort.
- Built internal monitoring utilities with automated alerts and metrics tracking for faster issue detection and operational visibility.
- Managed database backup workflows directly to remote storage without impacting local infrastructure resources.
- Contributed to engineering hiring initiatives through campus interviews and intern mentoring.
- Collaborated with Product, QA, DevOps, and Customer Success teams in agile sprint cycles to deliver high-quality product features.
- Redesigned the platform build strategy, reducing build times by ~80% (30–40 mins → 5–10 mins).
- Resolved major cross-site scripting (XSS) vulnerabilities, significantly strengthening platform security.
- Improved Power BI embed token lifespan from 2 months to 4 months through Redis-based caching optimization.
- Contributed to platform modernization initiatives across frontend architecture, deployment workflows, and infrastructure tooling.

### **Associate Product Engineer Intern | DeltaX**

Remote | Jan 2023 – Jun 2023

- Completed an intensive full-stack engineering bootcamp focused on backend development, application architecture, REST APIs, frontend engineering, and DevOps fundamentals using the .NET and Vue.js ecosystem.
- Built CRUD-based applications using .NET Core, SQL Server, Dapper, and Entity Framework following Service-Repository architecture patterns.
- Developed RESTful APIs following modular backend design principles.
- Built responsive UI components using Vue.js, Bootstrap, HTML, CSS, and JavaScript.
- Gained strong understanding of OOP, LINQ, database normalization, joins, stored procedures, CI/CD workflows, IIS deployments, and modular development practices using Git, Node.js, and npm.
- Successfully transitioned from engineering bootcamp trainee to full-time Associate Product Engineer at DeltaX.

### **Web Development Summer Internship | Nagarro**

Remote | Jul 2022 – Aug 2022

- Completed an intensive web development training program covering HTML, CSS, JavaScript, Bootstrap, React.js, REST APIs, and MongoDB.
- Built multiple frontend-focused projects involving API integrations, responsive UI development, and interactive web components.
- Developed a centralized project showcase portal to consolidate internship assignments and mini-projects.

## **Education**

---

### **Bachelor of Technology (B.Tech) in Information Technology**

Asansol Engineering College, Asansol, West Bengal | 2019 – 2023
